Please see T.M. Cobb Co.'s Brochure entitled "Care and Finishing Instructions" located on our website at www.TMCobb.com under the Brochures section for complete Flush Door Specifications and Warranty.

WARNING

Tempered glass contains varying degrees of distortion. These distortions may affect view and are not considered a defect. All tempered glass has this characteristic.

Product performance requires proper product selection and correct installation. Therefore, it is the sole responsibility of the Architect, Specification Writer, Contractor, Building Owner or the Installer to ensure the following; (A) All products selected and purchased meet all Local, State and Federal Governments' codes and regulations (B) All products selected and purchased are compatible with any and all conditions that may occur at the installation site either present or future (C) are properly stored, handled, installed and finished.

HOLLOW CORE FLUSH DOORS

Hollow Core Doors are recommended for Interior installation only.

Other Wood Species available - Please submit for Quote.

Fire Door Facts:

Highest rating for a Wood Fire Door is 1-1/2 hours (B-Label).

Maximum size for 1/3-Hour, 3/4-Hour or 1-Hour doors is 4/0 x 9/0 or 3/0 x 10/0 Single Doors;

8/0 x 8/0 Regular Pair or 8/0 x 8/0 Double Egress.

For 1-1/2 Hour doors 4/0 x 9/0 Single door; 6/0 x 7/0 or 8/0 x 8/0 Regular Pair. Not approved for Double Egress.

Maximum glass area (1/4" polished wire in approved metal surround) for 1-hour and 1-1/2 Hour Fire Doors is 100 square inches. Maximum width 10"; Maximum length 33"

Maximum glass area (1/4" polished wire in approved metal surround) for 1/3-hour and 3/4 hour Fire Doors is 1296 square inches. Maximum width 30"; maximum length 54".

Metal edges and astragals (FMEA) must be used on meeting edges of Fire Doors when used as a pair.

Fire Doors must be hung in an approved steel frame to maintain Warnock Hersey rating.

U.L. approved fusible link door louvers may be factory installed on wood fire doors - maximum size is 24" x 24"
For 60 & 90 minute Fire Doors only.

Full mortise or half-surface hinges may be used. Mortised hinges should be attached to door with #12 x 1-1/4" self-tapping sheet metal screws, cadmium plated or rust-resistant. Surface hinges to be secured with steel through bolts. Hinges must be applied to labeled edge of Fire Doors

Above information is generalized. For special conditions and requirements, contact the State Fire Marshal in your area. Correctness and selection shall be the sole responsibility of the purchaser. For further information please refer to Cobb Fire Door Specification pages.

Bonded to Core construction
Type-1 Adhesive

Let T.M.Cobb quote your Commercial project for you. Architectural doors, fire doors, acoustically rated doors. T.M.Cobb manufactures a full line of doors for commercial and institutional installations. This extensive product line can be factory equipped with vision panels and louvers, if desired. Using computer controlled cutting equipment, our detail department can prepare doors for locks, hinges and other hardware. Our factory finish exceeds the most stringent industry standards and is available in both standard and custom colors. Finishing of doors in a controlled environment results in a finish quality that is virtually unattainable at the job site.

This is just a sample of what we can offer you:

Plain Sliced American Black Walnut
Plain Sliced American Red Oak
Plain Sliced Cherry
Plain Sliced Honduras Mahogany
Plain Sliced Maple
Particle Board Core
Lumber Core

Plain Sliced Natural Birch
Plain Sliced Select White Birch
Rift Cut Red Oak
Rift Cut White Oak
Rotary Natural Birch
Mineral Core
Special Purpose Core

Rotary Red Oak
Rotary Select White Birch
Vertical Grain Fir
Medium Density Overlay
High Pressure Plastic Laminates
Protective Packaging
Prefinishing
