FINISHING

STILE and RAIL DOORS

- Check panel alignment - panels may need realignment. Tap into place using soft wood block and hammer.
- Back bed any stop-glazed lights and putty.
- Sand or fill and sand any blemishes. Sand with the grain. Ease sharp edges caused by fitting.
- Finish sand with 100 grit sandpaper and clean dust thoroughly

For Paint Finish

- Apply good oil based primer to all 6 surfaces including top and bottom, according to manufacturer's instruction. Lacquer based primer or sealers should not be used.
- Apply two coats of oil or latex resin-based finish paint. Care should be given to select finishes designed and manufactured to be used in combination.

- **Note: All surfaces must be fully sealed - 2 faces, 2 edges, plus top and bottom with all layers of paint or stain.**

For Stain Finish

- Stain the door with good grade stain or combination stain and sealer.
- **Apply 2 coats of high quality varnish or equal finishing product in accordance with manufacturer's instructions. Do not use lacquer on exterior surfaces.**

- Exterior doors require the last 2 coats to be of a high grade exterior finish.
- Semi-gloss luster gives the best appearance.

WARNING - Stain finishes tend to accentuate differences in grains, textures and patches in wood. You may wish to talk to your paint supplier about selecting a stain system that incorporates a paint finish first, with a stain second, followed by 2 coats of clear semi-gloss high grade exterior finish.

The Life Expectancy of today's finish products have been greatly reduced as a direct result of stringent environmental regulations, thus refinishing must be performed yearly.
