

PULP ART[®] SURFACES

THE ONLY ECO WALL SKIN
MADE IN THE U.S.A. - PATENT PENDING

Pulp Art Surfaces, LLC is an innovator in dimensional wall skin production, offering affordable and eco-friendly dimensional wall skins to the television and motion picture industry, commercial productions, trade shows, theater and retail stores. We are the sole manufacturer of environmentally sustainable dimensional wall skins.

WHAT ARE PAS WALL SKINS MADE FROM?

They are made from 100% recycled newspaper, cardboard and wood chips so they are recyclable, safe to work with, Green Dot compliant and conform to ISO 14000 standards.

WHAT'S THE DIFFERENCE BETWEEN "PAINTABLE ONLY" AND "PRINTABLE/PAINTABLE"?

We offer all of our patterns unfinished ("Paintable"), which are painted onsite by scenic. These are always in stock. We also offer some of our patterns finished ("Printable") using eco-friendly UV digital printing. These are print on demand and we have color options on our website. We can also do custom colors, logos, murals, etc. The patterns shown in "Paintable Only" are just the patterns that have too much dimension for us to print on them. They look amazing painted though!

HOW DURABLE ARE THEY?

Pulp Art Surfaces wall skins are approximately 3/16 inch thick so they are extremely durable. They do not crack when they are cut or stapled and they have a cushioning effect. Our pattern PAS201 is 1/16 inch thick.

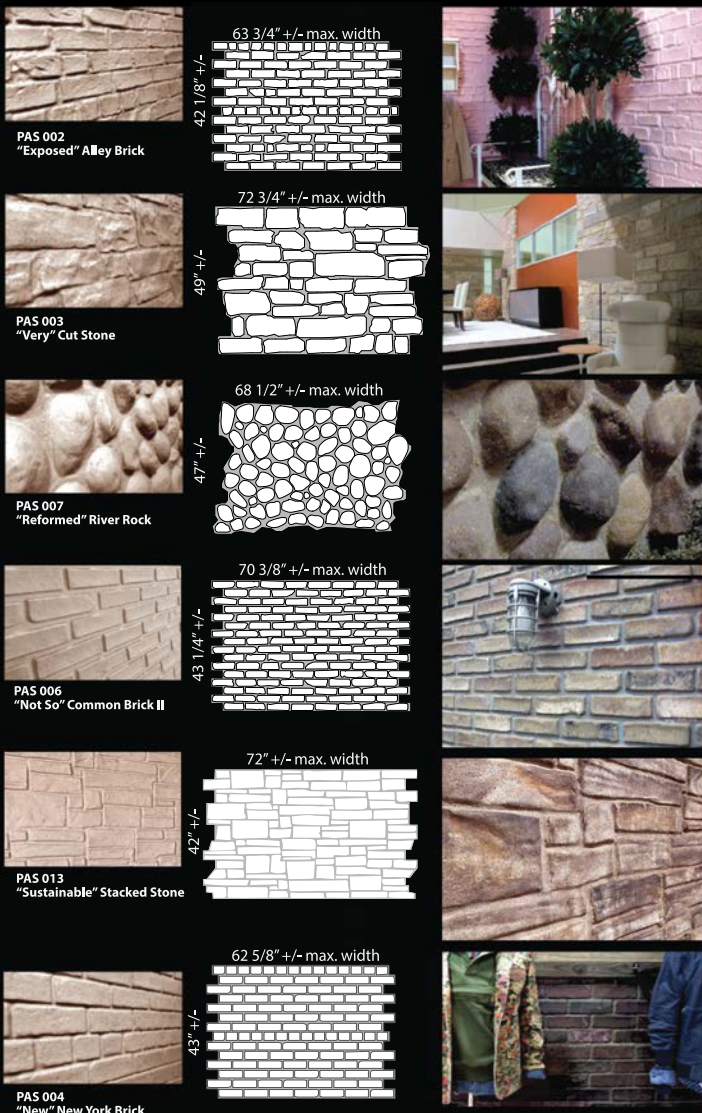

ARE PAS WALL SKINS SAFE AND EASY TO WORK WITH?

Yes! Pulp Art Surfaces wall skins are free of toxins and fire rated. Due to the thickness, they can be mitered and sanded. They have pre-trimmed finger joints, are flexible, strong and lightweight.

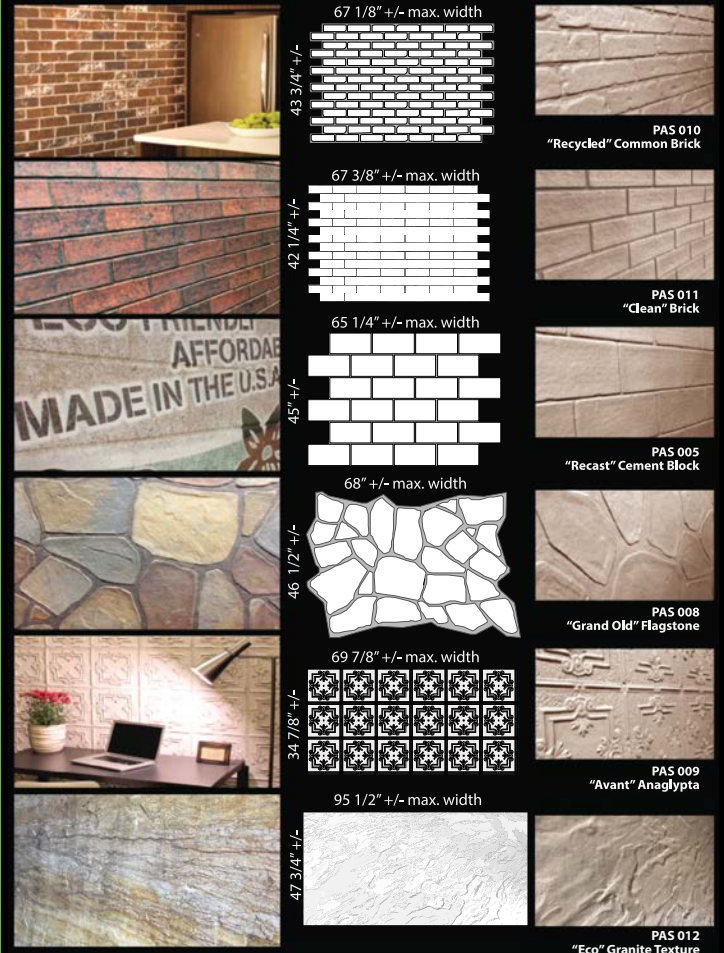

HOW DO THEY HOLD UP TO PAINT AND/OR WATER AGING?

Our product paints well with any paint product. There is no need for a primer, they have great adhesion and hold up well to water aging.

PAINTABLE ONLY
